

EVALUATION CRITERIA

Reviewers are asked to separately evaluate the proposals on the following two aspects:

A. Scientific merit

	0	1	2	3	4	5
Link to the disease						
Significance						
Innovation						
Appropriateness of design and methods						
Preliminary results						
Feasibility						
Safety						
Experience of the Applicant in the field						

B. Impact on patients

	0	1	2	3	4	5
How close to therapeutic development or to any other potential impact on patients are the proposed studies
